PROJECTS

ODOO CRM & HOSPITAL MANAGEMENT MODULE

Description: Developed a hospital management system in Odoo where doctors can log in separately and view only their assigned patients and details. Implemented role-based access control to ensure data privacy. Integrated appointment scheduling, patient history tracking, and automated notifications for better healthcare management.

ODOO SCHOOL MANAGEMENT MODULE

Description: Developed a school management system in Odoo where administrators can manage teacher records, and teachers can access student details, and performance reports. Implemented role-based access for secure data handling. Integrated automated attendance tracking and student progress monitoring for an efficient academic workflow

ODOO CUSTOMIZATION & ADVANCED FEATURES

Description: Experienced in extending res.partner to customize contact management across various Odoo modules. Implemented PDF generation for invoices, reports, and customized documents. Developed a secure token-based system for document downloads and authentication, ensuring controlled access. Proficient in enhancing Odoo’s functionalities with automated workflows, scheduled actions to optimize business processes.
